SAI SUMANTH MUMMANENI

Data Analyst · Data Science Graduate

+44 7884 880210

sumanth429@gmail.com

Beckenham, London, UK

TECHNICAL SKILLS

- Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn)
- SQL & Oracle 11g/12c
- Machine Learning & Predictive Modelling
- Exploratory Data Analysis (EDA)
- Data Cleaning & Wrangling
- Statistical Analysis
- Jupyter Notebook / Google Colab
- AI & Deep Learning Fundamentals
- Microsoft Excel (Advanced)
- Software QA & Manual Testing

COMPETENCIES

- Analytical Problem Solving
- Data Storytelling
- Structured Methodical Thinking
- Attention to Detail
- Agile Team Collaboration
- Technical Communication

EDUCATION

PG Cert – Data Science

University of Essex, UK

Merit (69%) | 2025–2026

BCA – Data Science

SRM University, India

CGPA 7.83 | 2022–2024

CertHE – BSc Computing

UCLan, Preston, UK 2019–

2020

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2026)
- Data Science: AI, ML, Python & SQL – Ranvi Technologies (2025–26)
- Oracle Database 11g/12c – Naresh Technologies (2019)
- HTML & JavaScript – Naresh Technologies (2019)
- C Programming – Naresh Technologies (2019)

PERSONAL PROFILE

Analytically minded Data Science graduate holding a PG Certificate with Merit (69%) from the University of Essex and a BCA in Data Science from SRM University. Skilled in Python, SQL and machine learning, with hands-on experience building data pipelines, performing statistical modelling and translating complex findings into clear, actionable business insights. Complemented by formal QA internship experience in a UK technology organisation. Actively seeking an entry-level Data Analyst or Junior Data Scientist role.

KEY PROJECTS

Customer Churn Prediction Model

2025–2026

University of Essex – PG Cert Project | Python / Scikit-learn

- Built a binary classification pipeline on 7,000+ records; Gradient Boosting achieved 87% accuracy, AUC-ROC 0.91.
- Applied full data preprocessing: imputation, feature encoding, normalisation, producing a clean analysis-ready dataset.
- Delivered a structured business report linking model outputs to customer retention strategy and revenue impact.

Retail Sales Performance Analysis Dashboard

2023–2024

SRM University – BCA Capstone (SGPA 9.44) | Python / SQL / Pandas

- Cleaned and transformed 15,000+ raw transaction records, cutting data anomaly rate by 30% through systematic quality checks.
- Identified seasonal trends and top/under-performing product categories across multiple regions using EDA techniques.
- Visualised comparative metrics with Matplotlib & Seaborn; presented to faculty panel, earning distinction-level grade.
- Produced management summary translating statistical outputs into four prioritised operational recommendations.

UK Housing Price Trend Analysis

2025

Independent / Self-Directed Research | Python / Pandas / SQL

- Analysed UK Land Registry data (2018–2024) to surface regional price movements across London boroughs.
- Correlated economic indicators (inflation, interest rates) with property values; documented findings in a structured notebook.

WORK EXPERIENCE

Manual Testing Intern

2021–2022

Clooper (via The Intern Group) | London, UK (Remote)

- Executed structured manual test cases across web and mobile features, logging defects and verifying fixes within sprint cycles.
- Designed test scenarios from user stories, contributing to a measurable reduction in post-release defects during the internship.
- Collaborated with developers to identify root causes of recurring failures, improving defect report clarity and resolution time.
- Maintained test plans, execution logs and summary reports; participated in Agile stand-ups and sprint reviews.
